TEXT:
TELECOMWORLDWIRE-12 November 2001- **LingoMotors** introduces information categorisation system (C)1994-2001 M2 COMMUNICATIONS LTD <http://www.m2.com>
US-based **LingoMotors** has launched a new system that is designed to automatically and accurately categorise a company's information in a standardised, consistent and retrievable way.
Based on **LingoMotors** ' Ordinary Language core technologies, the TurboCat solution 'reads between the lines' to understand the context...
...The solution does not, however, remove, rework or relocate the information during the categorisation process, **LingoMotors** notes.
Availability and pricing were not revealed.

LingoMotors Races to Deployment With WebGain.

... WebGain, a leading provider of integrated software to accelerate e-business development, today announced that **LingoMotors**, creators of language engines powered by Ordinary Language, has chosen to use WebGain products for...

...cut the time required to integrate TurboSearch into a customer's site while also reducing **LingoMotors**' reliance on costly outside developer resources.

"The initial use of WebGain products has been very...

...substantial return on investment on several fronts," said Ray Kattar, vice president of operations at **LingoMotors**. "With WebGain, we've achieved an easy-to-maintain J2EE component architecture and can meet...

...other tasks."

Component technology is a key aspect of the WebGain solution that is helping **LingoMotors** cut time and costs. TurboSearch "bolts on" to existing search engines, enabling them to understand...

...scripting to integrate with the existing search engine and database. WebGain Application Composer will enable **LingoMotors** to quickly assemble the necessary software components and integrate them without recourse to extensive Java...

...compose" custom implementations from reusable components.

"Our mission at WebGain is to help customers like **LingoMotors** accelerate development and streamline deployment. We're particularly pleased that WebGain component technology is helping **LingoMotors** make optimum use of their in-house resources," said Joe Menard, CEO of WebGain.

About LingoMotors

Based in Cambridge, Massachusetts **LingoMotors** makes language engines powered by Ordinary Language(TM). The company's core technologies enable full context understanding of content. This is the foundation for building a host of **LingoMotors**-powered solutions that provide users access to companies' valuable content. **LingoMotors** leverages previously hard-to-retrieve digital assets to satisfy the user, thereby generating revenue and...

LingoMotors Goes Live With TurboSearch at DEMO 2001.
LingoMotors (www.lingomotors.com), creators of a natural language core technology that reads and understands language, is unveiling...

...users with an easy-to-use search solution that returns superior results.

At DEMO 2001, **LingoMotors** will also announce a partnership with the AltaVista Company (www.altavista.com), the leading search...

...portfolio of products.

"AltaVista extends its value to e-commerce and corporate environments by incorporating **LingoMotors**' natural language technology," said Phil Rugani, executive vice president of enterprise search business for the...

...leading search and information marketplace for consumers and businesses.

Fresh from their DEMO 2001 splash, **LingoMotors** will announce its first customer -- a top five e-commerce site that, with the help of **LingoMotors**, is expected to change the way business is done on the Internet. A late February launch date is scheduled.

LingoMotors' TurboSearch product employs patent-pending software that allows questions to be asked in Ordinary Language...

...language solution for online searches, yet there has been an insatiable demand for one," said **LingoMotors** President and CEO John Hanselman. "By combining the best statistical and linguistic approaches, **LingoMotors** was successful in creating the only natural language solution. We made the intellectual investment other...

...content and information. It is not constrained by manual input.

It Understands All Content & Context:

LingoMotors' core technology is built on a natural language foundation that understands both structured and unstructured text, removing all search limitations.

About **LingoMotors**

Stationed in Cambridge, Massachusetts, **LingoMotors** (www.lingomotors.com) has created a natural language core technology that reads and understands language. **LingoMotors** technology uses patent-pending software that allows questions to be asked in Ordinary Language(TM...
